

Kathrin Brost

Vice President

Global Head of GoGreen

DHL Global Forwarding, Freight

Kathrin Brost is Vice President leading DHL Global Forwarding GoGreen department with its environmental protection program GoGreen since 2009.

The initial scope of the GoGreen program was to improve the company's carbon efficiency by 30% - including transportation services provided by subcontractors - compared with 2007 levels, by the year 2020. This target was reached in 2016.

In the future, the company will focus its activities even more intensively on emission-neutral logistics concepts. Deutsche Post DHL Group aims to achieve net zero logistics-related emissions by 2050.

In her previous role as project manager for DHL Consulting - the internal management consultancy of Deutsche Post DHL - Kathrin worked in international projects in the area of performance improvement, customer service, strategy and business development.

Kathrin holds a M.Sc. in Geology from the University of Hanover (Germany) and a M.Sc. in Environmental Management Practice from Durham University (UK).
